Christopher Gainey (b. 1981)

Through the Turmoil of Liquid Skies

for chamber orchestra

To:
David Gompper

Special Thanks:
Bruno Amato, Thomas Benjamin, Paul Mathews,
Manuel Barrueco and Ray Chester

The title of this piece, *Through the Turmoil of Liquid Skies*, is taken from *The Island of the Day Before* by Umberto Eco. In this book, a sailor finds himself stranded on an abandoned ship that is anchored on the international dateline. As he descends into madness, he continually contemplates the idea that he floats in a temporal limbo between yesterday and tomorrow. Of course, it is all a matter of perspective. The dateline does not define the border between past and future, but rather allows for the measurement of the passage of time according to set parameters. However, in his addled state, our hero finds this curious conceptual position a bit too hard to bear.

This piece uses differences in texture, density, and tempo to simulate the flexibility of our perception of time. However, the driving force behind this effect is the harmonic language. This piece is made entirely of harmonies derived through the frequency and ring modulation of a background two-voice framework. Differing levels of tension inherent in these harmonies create a continuum between spectrally-fused sonorities, and discrete harmonic and melodic figures.

Performance Notes

Instrumentation:

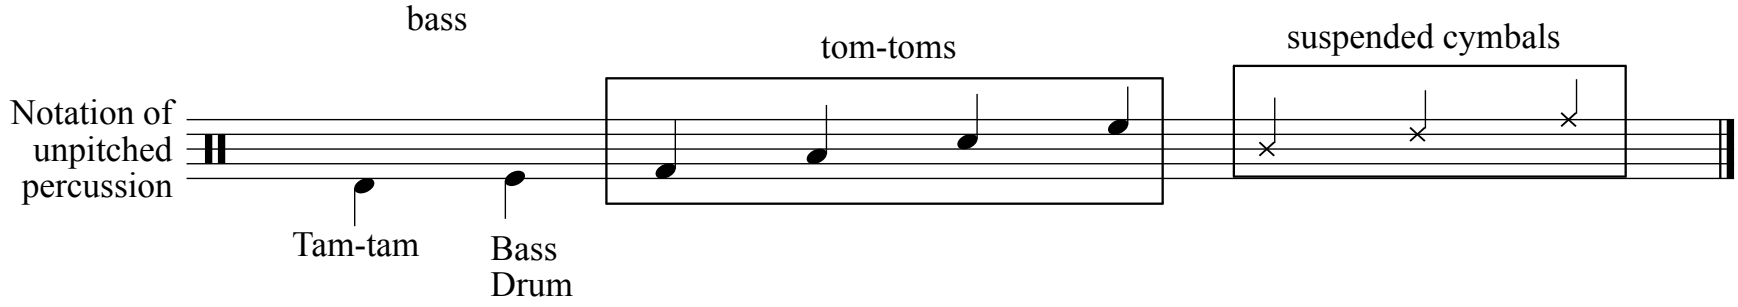
flute/piccolo
oboe
clarinet in B-flat
bassoon/contrabassoon

horn in F
trumpet in C/piccolo trumpet*
trombone

percussion I - bass drum, 3 suspended cymbals**, tam-tam, tom-toms,
glockenspiel, timpani***
percussion II - vibraphone, glockenspiel, marimba****, timpani

harp
piano

2 violins
viola
cello
bass



1. Some of the performers are asked to play quarter-tones in this piece. Performers should try to get as close to the quarter-tone as possible, however, a semi-tone approximation for each quarter-tone has been included (written above the note) in order to provide an alternative to an impossible (or near impossible) request. For transposing instruments (horn and clarinet) a semi-tone approximation for the written pitch is given with the semi-tone approximation of the concert pitch in parentheses.

2. Accidentals carry through the entire measure unless cancelled by another accidental.

3. Three slashes through the stem of a note (or above a note with no stem) indicate an unmeasured tremolo (for flute this indicates that the performer should flutter-tongue).

* The trumpet part may be performed without the use of a piccolo trumpet if one is not available.

** Three different suspended cymbals are called for in the piece; large, medium and small (notated accordingly with the smallest cymbal on the highest staff).

*** Four timpani will be needed for this piece.

**** This piece requires a five-octave marimba, however a four-and-a-half-octave marimba may be used as only two pitches in the entire piece would be beyond its range.
